AAO 2021

Exhibitor Guide and Hall Map

Presented by *EyeNet® Magazine*

**Where All of
Ophthalmology Meets®**

Protecting Sight. Empowering Lives.®

CONFORMITY IS THE ANTAGONIST OF INNOVATION.

Stellaris Elite
Vision Enhancement System

DUAL-FUNCTION VERSATILITY, FOR TODAY AND TOMORROW

- Stellaris Elite integrates cataract and retina capabilities into a single platform to maximize immediate and long-term return on investment (ROI)
- Stellaris Elite is infused with built-in abilities to seamlessly handle future updates and enhancements, optimizing its value for multi-use environments now and as future practice needs arise

Indications: The Bausch + Lomb Stellaris Elite® vision enhancement system is intended for the emulsification and removal of cataracts, anterior and posterior segment vitrectomy. The system is designed for use in both anterior and posterior segment surgeries. It provides capabilities for phacoemulsification, coaxial and bimanual irrigation/aspiration, bipolar coagulation, vitrectomy, viscous fluid injection/removal and air/fluid exchange operations. The Stellaris Elite® Vision Enhancement System configured with the laser module is additionally intended for retinal photocoagulation and laser trabeculoplasty. **Contraindications:** All Systems: Use of accessories not designated by Bausch + Lomb for use with this equipment may result in serious permanent patient injury, adverse surgical outcome, or damage to the equipment; Systems with Laser Module: Photocoagulation is not indicated for patients without pigmentation (albino eyes). In addition, Laser Indirect Ophthalmoscope (LIO) is not indicated for cases involving laser photocoagulation within the arcades. **Warnings:** All Systems: Implantable defibrillators present a risk of injury if triggered by a fibrillatory event during intraocular surgery; Electromagnetic interaction between the phacoemulsification (phaco) handpiece and an implanted cardiac pacemaker is unlikely but cannot be ruled out. Systems with Laser Module: All support personnel who are present during laser treatment must wear appropriate laser protective eyewear; **DO NOT** look directly into the aiming or treatment laser beam; Use of unapproved delivery devices may cause inaccurate laser delivery which could result in serious permanent patient injury. When using the VITESSE® handpiece: Use only the Entry Site Alignment (ESA) devices provided with the VITESSE® Handpiece Pack (yellow trocar caps). Do not use any ESA with metal components to avoid particulate in the eye. When using the FREEFLOW™ infusion line: Do not attempt to administer intraocular gases or viscous fluids using this device; The infusion line loop should be created in the horizontal plane. **General Cautions for Single Use Accessories:** Do not re-sterilize or reuse any single use accessories; Do not use if package integrity/sterile barrier has been breached or compromised; Do not use or attempt to repair damaged single use products. **This is not all you need to know. Systems with Laser Module: Misuse of the laser system may lead to dangerous situations and severe injuries. All Systems: See the appropriate Operator Manual for detailed directions, proper use, and full risk and safety information. See individual product instructions for use for detailed information on the use of the VITESSE® Handpiece, vitrectomy packs and cutters, and the FREEFLOW™ infusion line. CAUTION:** Federal (U.S.) Law restricts these devices to sale, by or on the order of a physician.

Welcome to New Orleans! *EyeNet's Exhibitor Guide* is designed to maximize your time on the show floor. The guide's alphabetical business listing helps you quickly identify companies to visit and highlights some of their new products and services. Use the lined pages in the back to plot your course through the hall or to take notes during vendor meetings. (Some booth numbers may have changed since the time of press. You can find an updated list on the Mobile Meeting Guide at aao.org/mobile.) We hope your time at AAO 2021 is productive and enjoyable.

Sincerely,

Dale E. Fajardo, EdD, MBA

TAKE ADVANTAGE OF THE VIRTUAL MEETING

You have multiple options for participating in the Academy's annual meeting, even from home.

The virtual platform includes access to selected sessions streamed live from New Orleans (which will also be recorded to view later), sessions recorded at the meeting and placed in the virtual meeting to view on demand, and special on-demand-only content developed exclusively for the virtual meeting.

Rewatch your favorite sessions or catch up on content you may have missed in New Orleans.

SafeSite™

Single-Use Instruments

SAVE TIME & MONEY

Removes hidden costs of time and resources spent on prep, cleaning, sterilization, repair, and replacement.

REDUCE RISK

Reduces risk of cross contamination.
Overall improved safety for patients and staff.

EYEPLAY EXPERIENCE

Take a break from AAO 2021 courses at the Academy's EyePlay Experience, Hall H, Booth 5214, Saturday through Monday.

Check it out to:

- give back to the community;
- recharge your mobile device;
- relieve stress with comfort animals;
- challenge a colleague to table tennis;
- put a puzzle together;
- get assistance at the Tech Bar;
- unwind and get your mind to relax between sessions with coloring therapy with the Foundation for Hospital Art Community Service Project; and
- take a selfie in the photo opp area.

BREAK FREE
FROM THE MERRY-GO-ROUND
OF EYE DROPS.
