responsiveness enables exceptional control.

**Stellaris Elite**  
Vision Enhancement System

AAO Booth 3044

(800) 338-2020 | StellarisElite.com

**Indications:** The Bausch + Lomb Stellaris Elite™ vision enhancement system is intended for the emulsification and removal of cataracts, anterior and posterior segment vitrectomy. The system is designed for use in both anterior and posterior segment surgeries. It provides capabilities for phacoemulsification, coaxial and bimanual irrigation/aspiration, bipolar coagulation, vitrectomy, viscous fluid injection/removal and air/fluid exchange operations. The Stellaris Elite vision enhancement system configured with the laser module is additionally intended for retinal photocoagulation and laser trabeculoplasty. **Contraindications:** All Systems: Use of accessories not designated by Bausch + Lomb for use with this equipment may result in serious permanent patient injury, adverse surgical outcome, or damage to the equipment. Systems with Laser Module: Photocoagulation is not indicated for patients without pigmentation (albino eyes). In addition, Laser Indirect Ophthalmoscope (LIO) is not indicated for cases involving laser photocoagulation within the arcades. **Warnings:** All Systems: Implantable defibrillators present a risk of injury if triggered by a fibrillatory event during intraocular surgery. Electromagnetic interaction between the phacoemulsification (phaco) handpiece and an implanted cardiac pacemaker is unlikely, but cannot be ruled out. Systems with Laser Module: All support personnel who are present during laser treatment must wear appropriate laser protective eyewear. **DO NOT** look directly into the aiming or treatment laser beam. Use of unapproved delivery devices may cause inaccurate laser delivery which could result in serious permanent patient injury. When using the Vitesse™ handpiece: Use only the Entry Site Alignment (ESA) devices provided with the Vitesse handpiece pack (yellow trocar caps). Do not use any ESA with metal components to avoid particulate in the eye. **This is not all you need to know. Systems with Laser Module: Misuse of the laser system may lead to dangerous situations and severe injuries. All Systems: See the appropriate Operator Manual for detailed directions, proper use, and full risk and safety information. See Vitesse handpiece pack Instructions for Use for detailed information on the use of the Vitesse handpiece. CAUTION:** Federal (U.S.) Law restricts this device to sale, by or on the order of a physician.

## CHECK YOUR EMAIL FOR AAO 2018 DAILY

For concise summaries of each day's clinical highlights, read *AAO 2018 Daily*, a brief bulletin emailed in the evening to you and to more than 70,000 of your colleagues in the global ophthalmic community. *AAO 2018 Daily* is reported onsite in Chicago Oct. 26-29, and allows ophthalmologists at the meeting and at home to stay on top of news from Subspecialty Day and AAO 2018. Additionally, these articles will be posted online at [aao.org/eyenet/daily](http://aao.org/eyenet/daily).

# Mastering intraocular pressure control with Rhopressa®

**rhopressa**<sup>®</sup>  
(netarsudil ophthalmic solution) 0.02%

## What makes once-daily Rhopressa® different

**Consistent mean IOP reduction of 5 mmHg** in patients across a range of baseline IOPs<sup>1</sup>

**Once-daily dosing** to simplify dosing regimens<sup>1</sup>

**Mild ocular adverse events** and no known contraindications opens up treatment options<sup>1</sup>

**Unique mechanism of action** for patients who may benefit from improved trabecular aqueous outflow<sup>1</sup>

Visit [Rhopressa.com](http://Rhopressa.com) to learn more about this innovative IOP-lowering treatment.

**Share the Vision** with Aerie Pharmaceuticals—join us at **AAO Chicago, Booth 747**

### INDICATION AND IMPORTANT SAFETY INFORMATION

#### INDICATION

Rhopressa® (netarsudil ophthalmic solution) 0.02% is a Rho kinase inhibitor indicated for the reduction of elevated intraocular pressure in patients with open-angle glaucoma or ocular hypertension.

**Dosage and Administration:** The recommended dosage is one drop in the affected eye(s) once daily in the evening.

#### IMPORTANT SAFETY INFORMATION

**Dosage and Administration:** Twice a day dosing is not well tolerated and is not recommended. If Rhopressa® is to be used concomitantly with other topical ophthalmic drug products to lower IOP, administer each drug product at least 5 minutes apart.

#### Warnings and Precautions:

**Bacterial Keratitis:** There have been reports of bacterial keratitis associated with the use of multiple-dose containers of topical ophthalmic products. These containers had been inadvertently contaminated by patients who, in most cases, had a concurrent corneal disease or a disruption of the ocular epithelial surface.

**Adverse reactions:** The most common ocular adverse reaction observed in controlled clinical studies with Rhopressa® dosed once daily was conjunctival hyperemia which was reported in 53% of patients. Other common (approximately 20%) adverse reactions were: corneal verticillata, instillation site pain, and conjunctival hemorrhage. Instillation site erythema, corneal staining, blurred vision, increased lacrimation, erythema of eyelid, and reduced visual acuity were reported in 5-10% of patients. The corneal verticillata seen in Rhopressa®-treated patients were first noted at 4 weeks of daily dosing. This reaction did not result in any apparent visual functional changes in patients. Most corneal verticillata resolved upon discontinuation of treatment.

**Please see brief summary of full Prescribing Information on the adjacent page.**

## RHOPRESSA® (netarsudil ophthalmic solution) 0.02%

Rx Only

### BRIEF SUMMARY

Consult the Full Prescribing Information for complete product information.

### INDICATIONS AND USAGE

RHOPRESSA® (netarsudil ophthalmic solution) 0.02% is indicated for the reduction of elevated intraocular pressure (IOP) in patients with open-angle glaucoma or ocular hypertension.

### DOSAGE AND ADMINISTRATION

The recommended dosage is one drop in the affected eye(s) once daily in the evening.

If one dose is missed, treatment should continue with the next dose in the evening. Twice a day dosing is not well tolerated and is not recommended. If RHOPRESSA is to be used concomitantly with other topical ophthalmic drug products to lower IOP, administer each drug product at least 5 minutes apart.

### WARNINGS AND PRECAUTIONS

#### Bacterial Keratitis

There have been reports of bacterial keratitis associated with the use of multiple-dose containers of topical ophthalmic products. These containers had been previously contaminated by patients who, in most cases, had a concurrent corneal disease or a disruption of the ocular epithelial surface.

#### Use with Contact Lenses

RHOPRESSA contains benzalkonium chloride, which may be absorbed by soft contact lenses. Contact lenses should be removed prior to instillation of RHOPRESSA and may be reinserted 15 minutes following its administration.

### ADVERSE REACTIONS

#### Clinical Trials Experience

Because clinical studies are conducted under widely varying conditions, adverse reaction rates observed in the clinical studies of a drug cannot be directly compared to rates in the clinical studies of another drug and may not reflect the rates observed in practice.

The most common ocular adverse reaction observed in controlled clinical studies with RHOPRESSA dosed once daily was conjunctival hyperemia which was reported in 53% of patients. Other common (approximately 20%) ocular adverse reactions reported were: corneal verticillata, instillation site pain, and conjunctival hemorrhage. Instillation site erythema, corneal staining, blurred vision, increased lacrimation, erythema of eyelid, and reduced visual acuity were reported in 5-10% of patients.

#### Corneal Verticillata

Corneal verticillata occurred in approximately 20% of the patients in controlled clinical studies. The corneal verticillata seen in RHOPRESSA-treated patients were first noted at 4 weeks of daily dosing. This reaction did not result in any apparent visual functional changes in patients. Most corneal verticillata resolved upon discontinuation of treatment.

### USE IN SPECIFIC POPULATIONS

#### Pregnancy

There are no available data on RHOPRESSA use in pregnant women to inform any drug associated risk; however, systemic exposure to netarsudil from ocular administration is low. Intravenous administration of netarsudil to pregnant rats and rabbits during organogenesis did not produce adverse embryofetal effects at clinically relevant systemic exposures.

#### Animal Data

Netarsudil administered daily by intravenous injection to rats during organogenesis caused abortions and embryofetal lethality at doses  $\geq 0.3$  mg/kg/day (126-fold the plasma exposure at the recommended human ophthalmic dose [RHOD], based on  $C_{max}$ ). The no-observed-adverse-effect-level (NOAEL) for embryofetal development toxicity was 0.1 mg/kg/day (40-fold the plasma exposure at the RHOD, based on  $C_{max}$ ).

Netarsudil administered daily by intravenous injection to rabbits during organogenesis caused embryofetal lethality and decreased fetal weight at 5 mg/kg/day (1480-fold the plasma exposure at the RHOD, based on  $C_{max}$ ). Malformations were observed at  $\geq 3$  mg/kg/day (1330-fold the plasma exposure at the RHOD, based on  $C_{max}$ ), including thoracogastroschisis, umbilical hernia and absent intermediate lung lobe. The NOAEL for embryofetal development toxicity was 0.5 mg/kg/day (214-fold the plasma exposure at the RHOD, based on  $C_{max}$ ).

#### Lactation

There are no data on the presence of RHOPRESSA in human milk, the effects on the breastfed infant, or the effects on milk production. However, systemic exposure to netarsudil following topical ocular administration is low, and it is not known whether measurable levels of netarsudil would be present in maternal milk following topical ocular administration. The developmental and health benefits of breastfeeding should be considered along with the mother's clinical need for RHOPRESSA and any potential adverse effects on the breastfed child from RHOPRESSA.

#### Pediatric Use

Safety and effectiveness in pediatric patients below the age of 18 years have not been established.

#### Geriatric Use

No overall differences in safety or effectiveness have been observed between elderly and other adult patients.

### NONCLINICAL TOXICOLOGY

#### Carcinogenesis, Mutagenesis, Impairment of Fertility

Long-term studies in animals have not been performed to evaluate the carcinogenic potential of netarsudil. Netarsudil was not mutagenic in the Ames test, in the mouse lymphoma test, or in the *in vivo* rat micronucleus test. Studies to evaluate the effects of netarsudil on male or female fertility in animals have not been performed.

## BEST OF SHOW VIDEOS

Check out the AAO 2018 News Sunday edition for information on this year's winners. View the videos at the Videos on Demand computer terminals in South Hall A and the Lakeside Center.

## Visit the Academy Resource Center

**Booth 508**

**Talk** to experts about MACRA and MIPS

**Demo** the Academy's Ophthalmic News and Education (ONE®) Network and IRIS® Registry (Intelligent Research in Sight)

**Get** expert practice management and coding advice

**Receive** late-breaking federal and state governmental affairs and advocacy information

**Renew** your Academy, ISRS or AAOE membership — or join

### ATTEND SPECIAL EVENTS:

#### Academy Foundation Donor Reception

Saturday, Oct. 27, 3 – 5 p.m.

Museum of Vision, Booth 704

As a special thank-you, the Academy Foundation invites its donors to meet Academy leaders, learn about the future home of the Museum of Vision and enjoy refreshments.

#### Ophthalmology® Glaucoma and Ophthalmology® Retina Launch Celebration

Sunday, Oct. 28, 10 – 11 a.m.

Resource Center, Booth 508

Subscribers, reviewers and published authors of the new *Ophthalmology Glaucoma* and *Ophthalmology Retina* journals are invited to meet editors-in-chief Henry D. Jampel, MD, and Andrew P. Schachat, MD, and the editorial boards.

#### EyeCare America® Volunteer Reception

Sunday, Oct. 28, 3 – 4:30 p.m.

Museum of Vision, Booth 704

EyeCare America volunteers, join your colleagues as we honor you and your dedication to this vital public service. Residents who have pledged to volunteer on entering practice are also invited to learn firsthand how satisfying the experience can be.

#### 2019 Focal Points® Spotlight Social

Monday, Oct. 29, 4 – 5 p.m.

Resource Center, Booth 508

Subscribers, editors, authors and contributors to *Focal Points* are invited to preview and celebrate the new format, which launches January 2019. Each new *Focal Points* issue will examine current research and discuss practical ways to implement it.

Marco Ophthalmic Booth 1810

**TRS-5100 Refraction System**  
Automated Digital Refractor

- Cuts refraction time by 25-50%
- Replaces a standard refractor
- Programmable refractions
- Instantaneous comparison of old vs. new Rx
- Integrates data to other automated devices through Marco Connect and EMR

TRS-5100 Product/Model name: REFRACTOR RT-5100

904-642-9330 [www.marco.com](http://www.marco.com)

**EYEPLAY EXPERIENCE**

- Take a break from AAO 2018 courses at the Academy's EyePlay Experience, available Saturday through Monday at Booth 2581. Check it out to:
- Give back to the community.
  - Recharge your mobile device.
  - Relieve stress with therapy animals.
  - Challenge a colleague to Ping-Pong.
  - Enjoy a complimentary seated massage.
  - Take a selfie with a giant #AAO2018 hashtag.
  - Get assistance at the Tech Bar.

Marco Ophthalmic Booth 1810

**OPD-SCAN III**  
Corneal Topographer, Integrated Wavefront Aberrometer, Pupilometer and Autorefractor/Keratometer

- 23 diagnostic tests in 10 seconds/eye
- Separates corneal & internal astigmatism
- Corneal spherical aberrations and coma
- Retro illumination images
- Angle kappa and Angle Alpha
- White to white corneal size
- Toric IOL Summary marks axis pre-op
- ECCP - Effective Central Corneal Power for IOL calculations

Integrated wavefront refractions with digital refractors & lens meters

Marco Ophthalmic Booth 1810

**ULTRA M SERIES Slit Lamps Series**

- Light-gathering Ultra Optics, enhanced by high-luminance LED
- Comfortable 6 degree converging tubes
- Compact & vertical tower light sources
- Patent-pending, built-in background illumination
- Up to five magnification settings
- Blue-correction LED, red-free, yellow, and cobalt filters
- Larger 0-14 mm, continuously variable aperture
- Joystick with illumination boost or image capture trigger
- Integrated, cable-free, low-voltage optimized for digital imaging integration
- Expanded chin rest for easier patient access

904-642-9330 [www.marco.com](http://www.marco.com)

Marco Ophthalmic Booth 1810

**iON IMAGING<sup>SM</sup> Anterior Segment Imaging**

- Intra-optics design
- Dedicated slit lamp imaging App
- On-board display for still and video images
- All controls at your fingertips
- Diagnose, image, integrate & educate in seconds
- Powerful educational teaching tool for staff and patients

904-642-9330 [www.marco.com](http://www.marco.com)

**CHECK OUT EYENET CORPORATE EVENTS**

**Marco Ophthalmic** Booth 1810

**EPIC® Refraction System**

- Sets the standard for time efficient refractions in only a 4'x6' footprint
- Five technologies at a single position workstation
- Customized with 4 Objective Refraction systems (or Slit Lamp) Plus acuity system and choice of lensmeters
- Motorized adjustable table
- Color touch screen that can be turned to patient for near testing
- Perfect for delegation or simply most efficient refractive productivity

904-642-9330 [www.marco.com](http://www.marco.com)

**Marco Ophthalmic** Booth 1810

**TS-310 Tabletop Refractive Workstation**

- Combined Digital Refractor and Chart System
- Ambidextrous Controls and dial button with S/C/A mode key
- Intuitive, high precision color LCD touch screen
- Same charts for far and near vision measurement
- Contrast sensitivity testing at 3 levels
- Rapid, quiet and smooth lens changes
- Flexible standing or seated measurement position
- Versatile, compact footprint with simple installation

AMERICAN ACADEMY  
OF OPHTHALMOLOGY®  
Protecting Sight. Empowering Lives.

Visit the Museum of Vision to see “Remedy,” an exhibit that features books on ophthalmic medicine published during the Renaissance and early modern periods.

The 2018 exhibit, “Remedy,” is devoted to the symptoms and treatments described in the Museum of Vision’s rare book library. Display cases explore early descriptions of disease and physicians’ use of natural plants, minerals, and metals as medication from the 16th to early 20th centuries.

## ACADEMY RESOURCE CENTER

See the latest products and learn what services the Academy has to offer at the Resource Center (Booth 508).

Academy staff members are on hand at the Information desk and throughout the exhibit to answer your questions and help you zero in on the resources that will be most useful for your practice. In addition, *AAO 2018 News* will be distributed in the literature bins.

**OphthalMed LLC** Booth 727

OphthalMed has been designing and manufacturing laser probes for endophotocoagulation since 2001. Our Bending Laser Probes, with or without widefield illumination, allow the surgeon to adjust and fix to an angle direction between 0 and 90 degrees. We can connect to all operating room lasers and light sources.

**Exhibitor Service Center**

Floor plan is accurate as of Sept. 7, 2018.

# Learn about Interventional Glaucoma at AAO 2018

Ellex technology, which includes advanced SLT Selective Light Therapy and ABiC™ canal-based glaucoma surgery, performed with the iTrack™ surgical system, gives you the ability to intervene across the full spectrum of the glaucoma disease process – and enables significant numbers of patients to minimize or obviate the need for anti-glaucoma medications. Join us at AAO 2018 Exhibit #1044 for a series of physician-led initiatives to see first-hand how Ellex’s interventional glaucoma technologies can help you to prioritize proactive glaucoma care.

MEET THE EXPERT	MYTH BUSTER		
<p>SAT, 27 OCT SUN, 28 OCT</p> <p>10:00 - 11:00am 3:00 - 4:00pm</p>	<p>SAT, 27 OCT SUN, 28 OCT</p> <p>10:30 - 11:00am 3:00 - 3:30pm</p>	 <p>MAHMOUD KHAIMI, MD</p>	 <p>PAUL SINGH, MD</p>
