

Participant Financial Disclosure Index

The Academy's Board of Trustees has determined that a financial relationship should not restrict expert scientific, clinical, or non-clinical presentation or publication, provided that appropriate disclosure of such relationship is made. Similarly, it should not restrict participation in AAO leadership or governance, so long as appropriate disclosure is made. As an ACCME accredited provider of CME, the Academy seeks to ensure balance, independence, objectivity, and scientific rigor in all individual or jointly sponsored CME activities.

All contributors to Academy educational and leadership activities must disclose significant financial relationships (defined below) to the Academy annually. The ACCME requires the Academy to disclose the following to participants prior to the activity:

- Any known financial relationships a meeting presenter, author, contributor or reviewer has reported with manufacturers of commercial ophthalmic products or providers of commercial ophthalmic services within the past 12 months
- Meeting presenters, authors, contributors or reviewers who report they have no known financial relationships to disclose

The Academy will request disclosure information from meeting presenters, authors, contributors or reviewers, committee members, Board of Trustees, and others involved in Academy leadership activities ("Contributors") annually. Disclosure information will be kept on file and used during the calendar year in which it was collected for all Academy activities. Updates to the disclosure information file should be made whenever there is a change. At the time of submission of a Journal article or materials for an educational activity or nomination to a leadership position, each Contributor should specifically review his/her statement on file and notify the Academy of any changes to his/her financial disclosures. These requirements apply to relationships that are in place at the time of or were in place 12 months preceding the presentation, publication submission, or nomination to a leadership position.

FINANCIAL RELATIONSHIP DISCLOSURE

For purposes of this disclosure, a known financial relationship is defined as any financial gain or expectancy of financial gain brought to the Contributor or the Contributor's immediate family (defined as spouse, domestic partner, parent, child or spouse of child, or sibling or spouse of sibling of the Contributor) by:

- Direct or indirect compensation;
- Ownership of stock in the producing company;
- Stock options and/or warrants in the producing company, even if they have not been exercised or they are not currently exercisable;
- Financial support or funding to the investigator, including research support from government agencies (e.g., NIH), device manufacturers, and/or pharmaceutical companies; or
- Involvement with any for-profit corporation that is likely to become involved in activities directly impacting the Academy where the Contributor or the Contributor's family is a director or recipient of a grant from said entity, including consultant fees, honoraria, and funded travel.

Description of Financial Interests

Category	Code	Description
Consultant / Advisor	C	Consultant fee, paid advisory boards or fees for attending a meeting (for the past 1 year)
Employee	E	Employed by a commercial entity
Lecture Fees	L	Lecture fees (honoraria), travel fees or reimbursements when speaking at the invitation of a commercial sponsor (for the past 1 year)
Equity Owner	O	Equity ownership/stock options (publicly or privately traded firms, excluding mutual funds)
Patents / Royalty	P	Patents and/or royalties that might be viewed as creating a potential conflict of interest
Grant Support	S	Grant support for the past year (all sources) and all sources used for this project if this form is an update for a specific talk or manuscript with no time limitation
