

## American Academy of Ophthalmology

### How to Use Claims to Manually Report 2018 Quality Data under MIPS

**Background:** In 2018, the reporting requirement for the Quality category of the MIPS program was increased to the full calendar year. The purpose of this guide is to educate ophthalmologists on how to meet the requirements of the Quality category of MIPS using Medicare claims reporting. Failure to successfully participate in MIPS in 2018 will lead to a 5% penalty on all Medicare Part B payments in 2020, so participation is in your best interest. Two things to consider before reading:

1. *Avoiding the Penalty or Earning a Bonus?*
  - This guide is focused on helping ophthalmologists in small practices ( $\leq 15$  clinicians) meet the minimum criteria to avoid a penalty under the MIPS program. If you would like to do more (either to prepare yourself for next year or to earn a bonus), see [Appendix B](#).
2. *Reporting as an Individual or as a Group?*
  - In the Quality category, **only providers reporting as individuals** may submit data via claims. Either you are in a solo practice, or in a group practice where every member of the group is reporting at the individual level.
3. *Is claims-based reporting the best option for you or your group?*
  - The Academy recommends the IRIS Registry® for quality reporting. It is a free member benefit and is tailored to ophthalmologists. In addition, the IRIS Registry Web Portal does not require reporting in real time as claims-based reporting does, and there is less uncertainty as you are able to track the patients and quality measures on which you report. Under claims-based reporting, CMS only confirms on remittance advice that the submission was received, but not that it was successful.

#### Contents:

1. [Minimum Reporting \(Test Path\)](#)
  - a. [Finding the Right Measures](#)
  - b. [Reporting the Measures](#)
2. [Beyond Minimum Reporting \(Partial/Full Path\)](#)
3. [Appendix](#)
  - a. [Comparison 2017 vs 2018 MIPS Quality Data Codes](#)
  - b. [Quality Measures Benchmarks](#)

## I. Minimum Reporting:

### A. Finding the Right Measures

For the Quality category in the 2018 transition year (*the second year of the MIPS program*), all clinicians in **small practices (≤ 15 clinicians)** can avoid the payment penalty by simply reporting on **6 measures (including 1 outcome measure), for 1 patient each**. The steps to fulfilling these minimum reporting requirements are listed below:

- i) Visit the [MIPS Quality Reporting](#) page on the Academy website. Here, you will see the full list of 61 MIPS Quality measures that are either *specific* or relevant to ophthalmology.
- ii) **Select the applicable measures.** Not all of these 61 measures can be reported via claims data. Some can only be reported via EHR or the IRIS Registry. To filter the list, select **Claims** under the side panel labeled “Measure Types.”

The screenshot shows a web interface for selecting MIPS Quality measures. On the left, a sidebar titled "MEASURE TYPES" lists various reporting methods: All Topics, Claims (highlighted with a red circle), Registry, Registry Web Portal, EHR, Group, Cataract, Comprehensive, and Cornea. The main content area is titled "Quality Measures for Merit-Based Incentive Payment System". Below the title, a note states: "IRIS Registry QCDR measures, listed in the bottom half of the page, have been updated for the 2018 reporting year. **Scoring note:** The quality category contributes 50 percent to your overall 2018 Merit-Based Incentive Payment System score, 60 percent to your 2017 score." Below this note, a filter bar shows "1-16 of 16 results" (circled in red) and a dropdown menu set to "All". The first measure listed is "Measure 1: Diabetes: Hemoglobin A1c Poor Control", with a sub-note: "in Pediatric/Strabismus, EHR, Claims, Glaucoma, Intermediate outcome, Comprehensive, Cataract, Cornea, Neuro-Ophthalmology, Registry Web Portal, Group, Retina".

This will narrow the list to 16 ophthalmology relevant measures that can be submitted via claims. Each measure is identified based on its **Quality ID #**. Make sure to select applicable measures (measures relevant to your services or care rendered) to report on. (*In this example, Measure 117 has been selected*)

iii) View the basic description of the measure. The **Description** section will describe how often the numerator/denominator codes for a measure have to be included in a claim for the patient.

## Measure 117: Diabetes: Eye Exam

+ Add to My To-Do List Views 3774

Updated January 2018.

### Reporting Options:

- IRIS Registry EHR: groups and individuals
- IRIS Registry manual data entry: groups and individuals
- EHR through your vendor (if offered): groups and individuals
- Claims-based reporting: individuals only

**Measure Type:** Process

**Description:** This measure is to be reported a minimum of once per performance period for patients, aged 18 -75 years old, with a diagnosis of diabetes seen during the performance period. This measure quantifies the percentage of these patients who had a retinal or dilated eye exam by an eye care professional during the measurement period or a negative retinal or dilated eye exam (no evidence of retinopathy) in the 12 months prior to the measurement period.

Frequency of Reporting

Patient Characteristics (Denominator Criteria)

iv) **Denominator:** There are 3 criteria for patient inclusion in the denominator (denominator eligibility).

1. **Patient Characteristics:** Description located in “Description” (see above)
2. **Diagnosis Codes (ICD-10-CM):** Codes located in “Diagnosis Codes”
3. **Procedure Codes (CPT and HCPCS):** Codes located in “CPT Codes”

The quality measure may also have exclusions for the denominator

## Diagnosis Codes

CMS has stated that ICD-10 should be coded to the greatest specificity and unspecified codes may be denied. Therefore, the codes listed below with a strikethrough should not be included on your claim or submitted with this quality measure.

E10.10, E10.11, E10.21, E10.22, E10.29, E10.311, E10.319, E10.3211, E10.3212, E10.3213, E10.3219, E10.3291, E10.3292, E10.3293, ~~E10.3299~~, E10.3311, E10.3312, E10.3313, ~~E10.3319~~, E10.3391, E10.3392, E10.3393, ~~E10.3399~~, E10.3411, E10.3412, E10.3413, ~~E10.3419~~, E10.3491, E10.3492, E10.3493, ~~E10.3499~~, E10.3511, E10.3512, E10.3513, ~~E10.3519~~, E10.3521, E10.3522, E10.3523, ~~E10.3529~~, E10.3531, E10.3532, E10.3533, ~~E10.3539~~, E10.3541, E10.3542, E10.3543, ~~E10.3549~~, E10.3551, E10.3552, E10.3553, ~~E10.3559~~, E10.3591, E10.3592, E10.3593, ~~E10.3599~~, E10.36, E10.37X1, E10.37X2, E10.37X3, ~~E10.37X9~~, E10.39, E10.40, E10.41, E10.42, E10.43, E10.44, E10.49, E10.51, E10.52, E10.59, E10.610, E10.618, E10.620, E10.621, E10.622, E10.628, E10.630, E10.638, E10.641, E10.649, E10.65, E10.69, E10.8, E10.9, E11.00, E11.01, E11.21, E11.22, E11.29, E11.311, E11.319, E11.3211, E11.3212, E11.3213, ~~E11.3219~~, E11.3291, E11.3292, E11.3293, ~~E11.3299~~, E11.3311, E11.3312, E11.3313, ~~E11.3319~~, E11.3391, E11.3392, E11.3393, ~~E11.3399~~, E11.3411, E11.3412, E11.3413, ~~E11.3419~~, E11.3491, E11.3492, E11.3493, ~~E11.3499~~, E11.3511, E11.3512, E11.3513, ~~E11.3519~~, E11.3521, E11.3522, E11.3523, ~~E11.3529~~, E11.3531, E11.3532, E11.3533, ~~E11.3539~~, E11.3541, E11.3542, E11.3543, ~~E11.3549~~, E11.3551, E11.3552, E11.3553, ~~E11.3559~~, E11.3591, E11.3592, E11.3593, ~~E11.3599~~, E11.36, E11.37X1, E11.37X2, E11.37X3, ~~E11.37X9~~, E11.39, E11.40, E11.41, E11.42, E11.43, E11.44, E11.49, E11.51, E11.52, E11.59, E11.610, E11.618, E11.620, E11.621, E11.622, E11.628, E11.630, E11.638, E11.641, E11.649, E11.65, E11.69, E11.8, E11.9, E13.00, E13.01, E13.10, E13.11, E13.21, E13.22, E13.29, E13.311, E13.319, E13.3211, E13.3212, E13.3213, ~~E13.3219~~, E13.3291, E13.3292, E13.3293, ~~E13.3299~~, E13.3311, E13.3312, E13.3313, ~~E13.3319~~, E13.3391, E13.3392, E13.3393, ~~E13.3399~~, E13.3411, E13.3412, E13.3413, ~~E13.3419~~, E13.3491, E13.3492, E13.3493, ~~E13.3499~~, E13.3511, E13.3512, E13.3513, ~~E13.3519~~, E13.3521, E13.3522, E13.3523, ~~E13.3529~~, E13.3531, E13.3532, E13.3533, ~~E13.3539~~, E13.3541, E13.3542, E13.3543, ~~E13.3549~~, E13.3551, E13.3552, E13.3553, ~~E13.3559~~, E13.3591, E13.3592, E13.3593, ~~E13.3599~~, E13.36, E13.37X1, E13.37X2, E13.37X3, ~~E13.37X9~~, E13.39, E13.40, E13.41, E13.42, E13.43, E13.44, E13.49, E13.51, E13.52, E13.59, E13.610, E13.618, E13.620, E13.621, E13.622, E13.628, E13.630, E13.638, E13.641, E13.649, E13.65, E13.69, E13.8, E13.9, O24.011, O24.012, O24.013, ~~O24.019~~, O24.02, O24.03, O24.111, O24.112, O24.113, ~~O24.119~~, O24.12, O24.13, O24.311, O24.312, O24.313, ~~O24.319~~, O24.32, O24.33, O24.811, O24.812, O24.813, ~~O24.819~~, O24.82, O24.83

Diagnosis Codes

CPT Codes

## CPT Codes

92002, 92004, 92012, 92014, 99201, 99202, 99203, 99204, 99205, 99212, 99213, 99214, 99215, 99341, 99342, 99343, 99344, 99345, 99347, 99348, 99349, 99350, G0402, G0438, G0439

**Denominator Exclusions (patient ineligible):** Patient is using hospice services any time during the measurement period: G9714

Denominator Exclusion

Note: Some codes have an asterisk (\*) next to them. These are for Registry submission only.

v) **Numerator:** The Numerator is based on CPTII codes, and these Quality Data Codes (QDCs) are organized into one of three categories.

1. **Performance Met (Patient is Included in Numerator, Patient is Included in Denominator)**
2. **Denominator Exclusion (Patient is Not Included in Numerator, Patient is Not Included in Denominator).**
3. **Performance Not Met (Patient is Not Included in Numerator, Patient is Included in Denominator) Denominator)**

## Category II Codes

- **Performance met** (patient included in numerator *and* denominator):

**2022F** Dilated retinal eye exam with interpretation by an ophthalmologist or optometrist documented and reviewed

Or

**2024F** Seven standard field stereoscopic photos with interpretation by an ophthalmologist or optometrist documented and reviewed

Or

**2026F** Eye imaging validated to match diagnosis from seven standard field stereoscopic photos results documented and reviewed

Or

**3072F** Low risk for retinopathy (no evidence of retinopathy in the prior year)\*

\*Note: This code can only be used if the encounter was during the measurement period because it indicates that the patient had "no evidence of retinopathy in the prior year". This code definition indicates results were negative; therefore a result is not required.

- **Exclusion** (patient not included in numerator *or* denominator):

**G9714** Patient is using hospice services any time during the measurement period

- **Performance *not* met** (patient *not* included in numerator, but included in denominator):

**2022F, 2024F or 2026F, with 8P** Dilated eye exam was not performed, reason not otherwise specified

Performance  
Met

Denominator  
Exclusion

Performance  
Not Met

## B. Reporting the Measures

- i) Report on Quality Measures on a regular CMS 1500 Medicare Part B Claim. Identify a patient encounter that is relevant to your selected quality measure (or vice versa), and add the QDC to the "Procedures, Services, and Supplies" section of the Claim form.
- ii) **Note:** *The Quality Code must be submitted as its own line item, and must include a value of \$0.01 under the "\$ Charge" section.*
- iii) **Note:** When reporting, make Sure to Use MIPS QDCs, not old PQRS QDCs.

On the next page is an example of a CMS 1500 form with Quality Reporting. The patient was seen for an office visit, and the provider is reporting on Quality Measure ID# 117, using Quality Data Code 2022F.

OMB APPROVAL PENDING

## II. Beyond Minimum Reporting (Partial/Full path)

Clinicians in small practices ( $\leq 15$  clinicians) will receive 3 out of 10 points for each quality measure reported on at least 1 patient (up to 6 measures, maximum). To be eligible to receive the remaining 7 out of 10 points for each quality measure, additional criteria must be met.

Going beyond minimum reporting requirements are the partial and full paths. The only difference between these paths is how comprehensive your reporting is. The maximum number of points within the Quality category is 60, and a provider can report on up to 6 measures (6 measures x 10 points each = 60 points total). The Quality category is weighted at 50% of the MIPS Final Score, meaning that a perfect Quality score will contribute 50% of the MIPS Final Score. Other basic requirements include:

- i) **Performance Period:** Quality reporting must be done for a full calendar year within the 2018 performance year.
- ii) **Data Completeness:** For each measure, the clinician must report on at least 60% of all Medicare Part B denominator-eligible patients seen during the performance year (this number is the data completeness numerator for the measure).<sup>1</sup>
- iii) **Case Minimum:** For any quality measure, at least 20 patients must be included in the denominator.

**Scoring:** Apart from the 3 base points for participation, the additional 7 out of 10 points are based on **performance rate**, which is calculated based on the following formula:

$$\frac{\text{Performance Met}}{\text{Data Completeness Numerator} - \text{Denominator Exclusion} - \text{Denominator Exception}}$$

This performance rate percentage is compared to a benchmark (*individual for each measure based on collective performance*). Your score, out of 10, depends on which decile along the benchmark your performance rate lies within. **Note:** Since clinicians in small practices receive a base score of 3 points, the first three deciles are pooled into Decile 3. See [Appendix B](#) for performance required for each measure in order to earn more than 3 points.

Decile Range	Points Awarded	Decile Range	Points Awarded
Decile 3	3-3.9	Decile 7	7-7.9
Decile 4	4-4.9	Decile 8	8-8.9
Decile 5	5-5.9	Decile 9	9-9.9
Decile 6	6-6.9	Decile 10	10

<sup>1</sup> For example, for the Diabetic Retinopathy measures, the denominator-eligible patients are all patients between the ages of 18 and 75 years with diabetes.

**Appendix A: Comparison of 2017 vs. 2018 MIPS Quality Data Codes**

<u>Measure Title</u>	<u>Measure ID #</u>	<u>QDC Changes</u>
Diabetes: Hemoglobin A1C poor Control	1	NONE
