Scoring

Benchmarks (Continued)

How are Benchmarks Converted to Achievement Points?

- Each quality measure with a benchmark is scored using a 10-point scoring system, except for:

  o Measures capped at 7 points because they are in their second consecutive year of being topped out.

  o Measures that don't meet data completeness criteria.

  o Measures that are submitted with an insufficient case volume.

  o New measures in their first and second performance period.

- Historical performance distribution for each measure is used to define deciles of performance that are used as the benchmark for the measure.
