Dextenza Dexamethasone, lacrimal ophthalmic insert, 0.1 mg	4 units	J1096	JZ
Durysta	10 units	J7351	JZ

Table of Common Drugs *Continued*

Healion	N/A	No HCPCS code for ophthalmic use	N/A
IDose TR	1 unit	C9399, J3490	JZ
Methotrexate (MTX)	1 unit for 50 mg or less <i>*J9250 deleted from ASP pricing effective 4/1/24</i>	J9260	JZ
Mitomycin Ophthalmic, 0.2 mg (Mitosol)	1 unit, 0.2 mg	J7315	JZ
Omidria	4 units Mostly used in the facility setting	J1097	JZ
Photrexa Riboflavin 5 Phosphate, ophthalmic solution, up to 3mL	2 units Report any wastage of 1 unit with -JW modifier	J2787	JZ, 2 units used JW when wastage is 1 unit
Tepezza Injection, teprotumumab-trbw, 10 mg, for intravenous use	50 units *Be sure to correctly bill the units infused. Submit a second line with modifier -JW and units wasted when less than 50 units are infused.	J3241	JW
Triamcinalone (Kenalog)	For multidose vials, report 1 unit up to 10 mg. For single-use vials of 40 mg, report 1 unit and 3 units with -JW modifier*	J3301	JW single-dose vial No modifier if multidose
Vancomycin	1 unit, 500 mg	J3370	JZ single-dose vial, 500 mg No modifier if multidose
COMPOUNDED DRUGS (eg, compounded syringe of Vancomycin, Ceftazidime)	1 unit Indicate medication name(s) and dosage in item 19 of CMS 1500 or electronic equivalent.	J7999 or J3490	JZ [‡]

*Denotes that wastage should be indicated.

**Unique payer policies may have an expanded covered diagnosis list per medication.

***Obtain appropriate consent for off-label use. Visit omic.com for consent examples.

‡ Denotes off-label use. Report modifier JZ per unique payer policies. When repackaged single dose syringes are administered with no discarded amounts, excluding overfill, CMS advised in the 2024 Medicare PFS that modifier JZ would be appropriate as any remaining drug is not reportable with modifier JW. This guidance is subject to change due to Medicare and/or MAC policy updates. For more information, visit www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Downloads/JW-Modifier-FAQs.pdf.
