Article Guidance

Article Text

The article will address anti-neoplastic agent codes provided for treatment of noncancer diagnoses or to substances such as monoclonal antibody agents, and other biologic response modifiers. The drugs cited are not intended to be a complete list of drugs that may be administered using the chemotherapy administration codes.

Coverage for medication is based on the patient's condition, the appropriateness of the dose and route of administration, based on the clinical condition, medical necessity and the standard of medical practice regarding the

effectiveness of the drug for the diagnosis and condition.

The listing of the chemotherapy agent and procedure code do not imply coverage. All the procedure codes are subject to Medicare rules and regulations, applicable Local Coverage Determinations (LCDs), and medical necessity. The chemotherapy agents may be subject to CCI (Corrective Coding Initiative) editing and hospital outpatient prospective payment system rules.

Bill Type Codes

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the article does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the article should be assumed to apply equally to all claims.

N/A

Revenue Codes

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the article, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the article should be assumed to apply equally to all Revenue Codes.
