Fund/Retina Research Foundation*

Protecting Sight. Empowering Lives.™

Published after collaborative  
review with the European Board  
of Ophthalmology subcommittee

The American Academy of Ophthalmology is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The American Academy of Ophthalmology designates this enduring material for a maximum of 15 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

CME expiration date: June 1, 2018. AMA PRA Category 1 Credits™ may be claimed only once between June 1, 2015, and the expiration date.

BCSC® volumes are designed to increase the physician's ophthalmic knowledge through study and review. Users of this activity are encouraged to read the text and then answer the study questions provided at the back of the book.

To claim AMA PRA Category 1 Credits™ upon completion of this activity, learners must demonstrate appropriate knowledge and participation in the activity by taking the posttest for Section 12 and achieving a score of 80% or higher. For further details, please see the instructions for requesting CME credit at the back of the book.

The Academy provides this material for educational purposes only. It is not intended to represent the only or best method or procedure in every case, nor to replace a physician's own judgment or give specific advice for case management. Including all indications, contraindications, side effects, and alternative agents for each drug or treatment is beyond the scope of this material. All information and recommendations should be verified, prior to use, with current information included in the manufacturers' package inserts or other independent sources, and considered in light of the patient's condition and history. Reference to certain drugs, instruments, and other products in this course is made for illustrative purposes only and is not intended to constitute an endorsement of such. Some material may include information on applications that are not considered community standard, that reflect indications not included in approved FDA labeling, or that are approved for use only in restricted research settings. **The FDA has stated that it is the responsibility of the physician to determine the FDA status of each drug or device he or she wishes to use, and to use them with appropriate, informed patient consent in compliance with applicable law.** The Academy specifically disclaims any and all liability for injury or other damages of any kind, from negligence or otherwise, for any and all claims that may arise from the use of any recommendations or other information contained herein.

AAO, AAOE, American Academy of Ophthalmology, Basic and Clinical Science Course, BCSC, EyeCare America, EyeNet, EyeSmart, EyeWiki, Focal Points, IRIS, ISRS, OKAP, ONE, Ophthalmic Technology Assessments, *Ophthalmology*, Preferred Practice Pattern, ProVision, SmartSight, The Ophthalmic News & Education Network, and the AAO logo (shown on cover) and tagline (Protecting Sight. Empowering Lives.) are, among other marks, the registered trademarks and trademarks of the American Academy of Ophthalmology.

### Faculty

Colin A. McCannel, MD, *Chair*, Los Angeles, California

Neal H. Atebara, MD, Honolulu, Hawaii

Stephen Jae Kim, MD, Nashville, Tennessee

Brian C. Leonard, MD, Ottawa, Canada

Richard B. Rosen, MD, New York, New York

David Sarraf, MD, Los Angeles, California

Emmett Cunningham, Jr, MD, PhD, MPH, *Consultant*, Hillsborough, California

Graham E. Holder, PhD, *Consultant*, London, England

The Academy wishes to acknowledge the American Society of Retina Specialists (ASRS), the Macula Society, and the Retina Society for recommending faculty members to the BCSC Section 12 committee.

The Academy also wishes to acknowledge the following committees for review of this edition:

*Committee on Aging*: Helen Ka-Fun Li, MD, Houston, Texas

*Vision Rehabilitation Committee*: Joseph L. Fontenot, Daphne, Texas

*Practicing Ophthalmologists Advisory Committee for Education*: David J. Browning, MD, PhD, *Primary Reviewer*, Charlotte, North Carolina; Edward K. Isbey III, MD, *Chair*, Asheville, North Carolina; Alice L. Bashinsky, MD, Asheville, North Carolina; Robert G. Fante, MD, Denver, Colorado; Bradley D. Fouraker, MD, Tampa, Florida; Dasa V. Gangadhar, MD, Wichita, Kansas; Steven J. Grosser, MD, Golden Valley, Minnesota; James A. Savage, MD, Memphis, Tennessee

*European Board of Ophthalmology:* Alain Gaudric, MD, Chair, Paris, France; Catherine Creuzot-Garcher, MD, PhD, FEBO, Liaison, Dijon, France; Bahram Bodaghi, MD, PhD, Paris, France; Giovanni Staurenghi, MD, Milan, Italy; Adnan Tufail, MBBS, MD, London, United Kingdom

The EBO wishes to acknowledge EURETINA for recommending reviewers to the EBO committee.

### **Financial Disclosures**

Academy staff members who contributed to the development of this product state that within the past 12 months, they have had no financial interest in or other relationship with any entity discussed in this course that produces, markets, resells, or distributes ophthalmic health care goods or services consumed by or used in patients, or with any competing commercial product or service.

The authors and reviewers state that within the past 12 months, they have had the following financial relationships:\*

Dr Bodaghi: Abbott Medical Optics (C), Allergan (C, S), Bausch + Lomb Surgical (C), Novartis Pharmaceuticals (S), Santen (C), Xoma (C)

Dr Browning: Aerpio Therapeutics (S), Alimera Sciences (C), Diabetic Retinopathy Clinical Research Network (S), Genentech (S), Novartis Pharmaceuticals (S), Pfizer (S), Regeneron Pharmaceuticals (S)

Dr Creuzot-Garcher: Alcon Laboratories (C, S), Bausch + Lomb (C), Laboratoires Thea (C), Novartis Pharmaceuticals (C, L, S)

Dr Fante: Ophthalmic Mutual Insurance Company (C)

Dr Fouraker: Addition Technology (C), Alcon Laboratories (C), KeraVision (C), Ophthalmic Mutual Insurance Company (C)

Dr Gaudric: Alcon Laboratories (C), Alimera Sciences (C), Bayer (C), Novartis Pharmaceuticals (C, S), ThromboGenics (C)

Dr Grosser: Ivantis (O)

Dr Holder: Servier (C), Isis Pharmaceuticals (C)

Dr Isbey: Alcon Laboratories (S), Bausch + Lomb (S)

Dr Leonard: Annidis (O), Bayer Healthcare Pharmaceuticals (C), Merck & Co (C), Novartis Pharmaceuticals (C), Orbis International (C), Pfizer (S), Regeneron Pharmaceuticals (C)

Dr McCannel: DORC Dutch Ophthalmic Research Center (International)/Dutch Ophthalmic USA (C)

Dr Rosen: Allergan (S), Clarity Medical Systems (C), Genentech (S), OD-OS (L), Optovue (C)

Dr Sarraf: Alcon Laboratories (S), Allergan (S), DORC Dutch Ophthalmic Research Center (International)/Dutch Ophthalmic USA (S), Genentech (S), Heidelberg Engineering (L), Regeneron Pharmaceuticals (S), ThromboGenics (S)

Dr Savage: Allergan (L)

Dr Staurenghi: Alcon Laboratories (C, L), Allergan (C), Bayer (C, L), Canon (C), Glaxo-SmithKline (C), Heidelberg Engineering (C, L), Kowa (S), Novartis Pharmaceuticals (C, L, S), Ocular Instruments (P), OD-OS (C), Optos (C), Optovue (C), QLT Phototherapeutics (C), Roche (C), Zeiss (S)

Dr Tufail: Alcon Laboratories (C), Allergan (C, L), Bayer Healthcare Pharmaceuticals (C), Genentech (C), Heidelberg Engineering (C), Notal Vision (S), Novartis Pharmaceuticals (C, L, S)

The other authors and reviewers state that within the past 12 months, they have had no financial interest in or other relationship with any entity discussed in this course that produces, markets, resells, or distributes ophthalmic health care goods or services consumed by or used in patients, or with any competing commercial product or service.

\*C = consultant fees, paid advisory boards, or fees for attending a meeting; L = lecture fees (honoraria), travel fees, or reimbursements when speaking at the invitation of a commercial sponsor; O = equity ownership/stock options of publicly or privately traded firms (excluding mutual funds) with manufacturers of commercial ophthalmic products or commercial ophthalmic services; P = patents and/or royalties that might be viewed as creating a potential conflict of interest; S = grant support for the past year (all sources) and all sources used for a specific talk or manuscript with no time limitation

## **Recent Past Faculty**

Richard S. Kaiser, MD

Adam A. Martidis, MD

Hermann D. Schubert, MD

David N. Zacks, MD, PhD

In addition, the Academy gratefully acknowledges the contributions of numerous past faculty and advisory committee members who have played an important role in the development of previous editions of the Basic and Clinical Science Course.

## **American Academy of Ophthalmology Staff**

# Contents

General Introduction . . . . .	xv
<b>Objectives</b> . . . . .	<b>1</b>
Introduction . . . . .	3
<b>PART I Fundamentals and Diagnostic Approaches</b> . . . . .	<b>5</b>
<b>1 Basic Anatomy</b> . . . . .	<b>7</b>
The Vitreous . . . . .	7
Neurosensory Retina . . . . .	8
Retinal Pigment Epithelium . . . . .	15
Bruch Membrane . . . . .	17
Choroid . . . . .	17
Sclera . . . . .	18
<b>2 Diagnostic Approach to Retinal Disease</b> . . . . .	<b>21</b>
Techniques of Examination . . . . .	21
Ophthalmoscopy . . . . .	21
Imaging Technologies . . . . .	22
Scanning Laser Ophthalmoscopy . . . . .	22
Optical Coherence Tomography . . . . .	23
Fundus Autofluorescence . . . . .	26
Retinal Angiographic Techniques . . . . .	28
B-Scan Ultrasonography . . . . .	34
<b>3 Retinal Physiology and Psychophysics</b> . . . . .	<b>37</b>
Electroretinography . . . . .	37
Full-Field (Ganzfeld) ERG . . . . .	38
Multifocal ERG . . . . .	42
Pattern ERG . . . . .	42
Clinical Considerations . . . . .	42
Electro-oculography . . . . .	44
Visual Evoked Cortical Potentials . . . . .	46
Psychophysical Testing . . . . .	47
Contrast Sensitivity . . . . .	48
Color Vision . . . . .	49
Dark Adaptation . . . . .	52
Photostress Recovery Time . . . . .	53

**PART II Disorders of the Retina and Vitreous . . . . . 55**

<b>4 Age-Related Macular Degeneration and Other Causes of Choroidal Neovascularization . . . . .</b>	<b>57</b>
Age-Related Macular Degeneration . . . . .	57
Genetics and AMD . . . . .	58
Nonneovascular AMD . . . . .	59
Neovascular AMD . . . . .	66
Other Causes of Choroidal Neovascularization . . . . .	79

# General Introduction

The Basic and Clinical Science Course (BCSC) is designed to meet the needs of residents and practitioners for a comprehensive yet concise curriculum of the field of ophthalmology. The BCSC has developed from its original brief outline format, which relied heavily on outside readings, to a more convenient and educationally useful self-contained text. The Academy updates and revises the course annually, with the goals of integrating the basic science and clinical practice of ophthalmology and of keeping ophthalmologists current with new developments in the various subspecialties.

The BCSC incorporates the effort and expertise of more than 90 ophthalmologists, organized into 13 Section faculties, working with Academy editorial staff. In addition, the course continues to benefit from many lasting contributions made by the faculties of previous editions. Members of the Academy Practicing Ophthalmologists Advisory Committee for Education, Committee on Aging, and Vision Rehabilitation Committee review every volume before major revisions. Members of the European Board of Ophthalmology, organized into Section faculties, also review each volume before major revisions, focusing primarily on differences between American and European ophthalmology practice.

## Organization of the Course

The Basic and Clinical Science Course comprises 13 volumes, incorporating fundamental ophthalmic knowledge, subspecialty areas, and special topics:

- 1 Update on General Medicine
- 2 Fundamentals and Principles of Ophthalmology
- 3 Clinical Optics
- 4 Ophthalmic Pathology and Intraocular Tumors
- 5 Neuro-Ophthalmology
- 6 Pediatric Ophthalmology and Strabismus
- 7 Orbit, Eyelids, and Lacrimal System
- 8 External Disease and Cornea
- 9 Intraocular Inflammation and Uveitis
- 10 Glaucoma
- 11 Lens and Cataract
- 12 Retina and Vitreous
- 13 Refractive Surgery

In addition, a comprehensive Master Index allows the reader to easily locate subjects throughout the entire series.

## References

Readers who wish to explore specific topics in greater detail may consult the references cited within each chapter and listed in the Basic Texts section at the back of the book.

These references are intended to be selective rather than exhaustive, chosen by the BCSC faculty as being important, current, and readily available to residents and practitioners.

## Videos

This edition of Section 12, *Retina and Vitreous*, includes videos related to topics covered in the book. The videos were selected by members of the BCSC faculty and are available to readers of the print and electronic versions of Section 12. Mobile-device users can scan the QR code below (a QR-code reader must already be installed on the device) to access the video content.

## Study Questions and CME Credit

Each volume of the BCSC is designed as an independent study activity for ophthalmology residents and practitioners. The learning objectives for this volume are given on page 1. The text, illustrations, and references provide the information necessary to achieve the objectives; the study questions allow readers to test their understanding of the material and their mastery of the objectives. Physicians who wish to claim CME credit for this educational activity may do so by following the instructions given at the end of the book.

## Conclusion

The Basic and Clinical Science Course has expanded greatly over the years, with the addition of much new text, numerous illustrations, and video content. Recent editions have sought to place greater emphasis on clinical applicability while maintaining a solid foundation in basic science. As with any educational program, it reflects the experience of its authors. As its faculties change and medicine progresses, new viewpoints emerge on controversial subjects and techniques. Not all alternate approaches can be included in this series; as with any educational endeavor, the learner should seek additional sources, including Academy Preferred Practice Pattern Guidelines.

The BCSC faculty and staff continually strive to improve the educational usefulness of the course; you, the reader, can contribute to this ongoing process. If you have any suggestions or questions about the series, please do not hesitate to contact the faculty or the editors.

The authors, editors, and reviewers hope that your study of the BCSC will be of lasting value and that each Section will serve as a practical resource for quality patient care.

# Objectives

---

Upon completion of BCSC Section 12, *Retina and Vitreous*, the learner should be able to

- describe the basic structure and function of the retina and its relationship to the pigment epithelium, choroid, and vitreous
  - select appropriate methods of examination and ancillary studies for the diagnosis of vitreoretinal disorders
  - identify specific pathologic processes that affect the choroid, retina, or vitreous
  - describe the principles of medical and surgical treatment of vitreoretinal disorders
  - incorporate data from major prospective clinical trials in the management of vitreoretinal disorders whenever possible
-
