Social Security Act (Title XVIII) Standard References:

- Title XVIII of the Social Security Act, Section 1833(e) states that no payment shall be made to any provider of services or other person under this part unless there has been furnished such information as may be necessary in order to determine the amounts due such provider or other person under this part for the period with respect to which the amounts are being paid or for any prior period.

Article Guidance

Article Text

This Billing and Coding Article provides billing and coding guidance for Local Coverage Determination (LCD) L35091, Cataract Extraction (including Complex Cataract Surgery). Please refer to the LCD for reasonable and necessary requirements.

Coding Guidance

Notice: It is not appropriate to bill Medicare for services that are not covered (as described by the entire LCD) as if they are covered. When billing for non-covered services, use the appropriate modifier.

The primary diagnosis submitted by the physician performing the preoperative ophthalmologic evaluation must be cataract (ICD-10-CM codes listed in the "ICD-10 Codes that Support Medical Necessity" section of this article).

The diagnoses submitted by the physician performing the evaluation and management component of the preoperative workup, when it is medically necessary, should indicate cataract (ICD-10-CM codes listed in the "ICD-10 Codes that Support Medical Necessity" section of this article) as the primary or secondary diagnosis.

Complex cataract extraction should require devices or techniques not generally used in routine cataract surgery.

Documentation Requirements

1. All documentation must be maintained in the patient's medical record and made available to the contractor upon request.
2. Every page of the record must be legible and include appropriate patient identification information (e.g., complete name, dates of service[s]). The documentation must include the legible signature of the physician or non-physician practitioner responsible for and providing the care to the patient.
3. The submitted medical record must support the use of the selected ICD-10-CM code(s). The submitted CPT/HCPCS code must describe the service performed.
4. When complex cataract procedures are reported the medical record must support that devices or techniques not generally used in routine cataract surgery were used, for example:
 - Insertion of iris retractors through additional incisions
 - Mechanical expansion of the pupil using iris hooks
 - Creation of a sector iridectomy with subsequent suture repair of iris sphincter
 - Use of intraoperative iris expansion device to maintain pupil dilation (i.e., Malyugin ring) iris sphincterotomies created with scissors
 - The need to support the lens implant with permanent intraocular sutures
 - Placement of a capsular support ring is necessary to allow secure placement of an intraocular lens

Bill Type Codes

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the article does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the article should be assumed to apply equally to all claims.

Revenue Codes

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory. Unless specified in the article, services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the article should be assumed to apply equally to all Revenue Codes.
